Resumo

I graduated in Business Administration in 2017 and now I am a Full Stack Web Development student at Trybe, a school that teaches how to program, learn and work.

I love technology and all the possibilities that it offers to change a person's life. I've decided to make that career change because I believe that technology is the best tool to make a fairer society and preserve the Earth.

I see myself as an easygoing person and believe that I can contribute and fit into any team with my empathy and communication skills.

Recently I've been studying JavaScript, React, Node.js, SQL, MongoDB and Unit Tests and learning a lot about soft skills. You can take a look at my codes and projects at my Github:: <https://github.com/mjossany>.

Experiência

Tottal Services

Treasury Analyst

agosto de 2017 - Present (4 anos 8 meses)

Rio de Janeiro, Brazil

My main tasks as Treasure Analyst are:

- Do all the companies payments;
- Issuance of invoices;
- Cash flow control;

To fulfill these tasks with excellence I had to evolve my organization a lot and this helped me in all other areas of my life.

Furnas

Estagiário de departamento financeiro

junho de 2015 - março de 2017 (1 ano 10 meses)

Rio de Janeiro, Brasil

Furnas Centrais Elétricas S.A. is a Brazilian power company controlled by state-run power holding company Eletrobras. The company generates or transmits electricity to 51% of households in Brazil and more than 40% of the nation's electricity passes through their grid. The company has a generating capacity of 10,050 MW which corresponds to 10% of Brazil's electrical production.

My main task as Finance Intern was:

- Calculate the renegotiation and additions of contracts with Furna's services providers.

It was a big experience to deal with high values contracts. My sense of responsibility increased a lot. Furthermore, I had to learn about the federal law that rules the contracts and take the law in consideration when analyzing the contracts and for sure I turned a more analytic person.

Oceaneering

Estagiário de Recrutamento e Seleção

agosto de 2014 - fevereiro de 2015 (7 meses)

Rio de Janeiro, Rio de Janeiro, Brasil

Oceaneering develops products and services for use throughout the lifecycle of an offshore oilfield, from drilling to decommissioning. It operates the world's premier fleet of work class ROVs. Additionally, they do oilfield maintenance services, umbilicals, subsea hardware, and tooling.

Working with human resources inside an international and big company as my first professional experience made me grow a lot. It was the perfect opportunity to develop my communication skills and all my soft skills in some manner, because I had no options beside talking with a lot of different people every day. It was amazing and so important to my personal development to have the opportunity to interact with all areas of the company.

- Responsible for organizing and execute all stages of the selection process since the selections for interview, passing through the selection interviews and dynamics to the hiring;

- Responsible for the onboard of new employees on their first weeks, when they receive more information about the company and some specific training according to their new positions;
- Participation at the organization and execution of some internal employees satisfaction surveys;
- Participation in the organization of internal events;
